My dearest Mother,

We are all glad to hear
how much better you are, and I
know you will from now on
take care of yourself.

I thought I had explained
the Power Sets business to you. The
position is that there is a large
organisation ^{owned by the State} devoted to gas turbines

and jet propulsion. It has been
controlled by a Company of which
I am Chairman & Man. Director.

This Company is owned by the
Govt. The Govt. now decides
that they will control New
gas turbine organisation ~~by~~ on
the lines of a Govt. Establishment,
like the Royal Aircraft

Establishment at Farnborough.
I shall be (instead of Chairman
& Man Director) Director of the

National Gas Turbine Establishment.

As a matter of fact, the Company will probably continue in existence, & I may still be on the Board of it, in order to deal in patents owned by the State. I feel that this aspect is too complicated to attempt to explain properly now.

I expect that later in the year I may take up other activities, but all that is

still vague.

We may buy a house here in Northwood. I will tell you more when the negotiations are further advanced.

The boys are in the garden building a snow house! The snow is fairly heavy here.

Duncan had lunch with me at the RAC yesterday. He expects to be going to India in about a couple of months. He is doing very well in the

Service.

Did I tell you I had bought an elegant little chess set? Christopher has taught me to play on & off in the last few years. Both the boys are better than me, but I beat C. once, last weekend.

I enclose cheque & will send the rest in a day or so. I never seem to have enough in my pocket book when I

6

wrote to you.

Love from us all

Your own son

Harold.
