PhD THESIS

Academic Year 2003-2006

DAHLINA DAUT MOHMUD

E-TRANSFORMATION IN THE PUBLISHING INDUSTRY

Supervisor: Prof. Peter Sackett

December 2006

This thesis is submitted in partial fulfilment of the requirements for the degree of Doctor of Philosophy

Abstract

This thesis presents the findings and conclusions of research that was undertaken with the purpose of understanding the issues and challenges of e-transformation in the publishing industry, particularly the editorial phase, and in a government controlled environment of Malaysia.

The research followed an exploratory inquiry and a case study approach, was conducted in a publishing house in Kuala Lumpur. This study was based upon data collected through in depth interview with 18 editors, documentary research (manuals, house styles, General Orders of the Government of Malaysia, forms, correspondence, other in house documents, speeches and local news), physical artefacts (132 edited manuscripts involving 33 editors), archival records (project files spanning 2 years of published works) and literature research. 10 major issues were identified and grouped into 4 categories, 4 major issues from previous failed systems identified, 9 major impacts categorised into 3 different categories were identified and 7 recommendations from the editors were identified for future systems. Focusing on these issues and impacts, several measures were recommended that would improve e-transformation in the company. Guidelines were developed to streamline the transformation and a new workflow proposed towards efficiency in a new medium. Disruption is also identified in the process of transformation.

The research concludes by describing the phenomena of transformation in the editorial phase, that there are issues, impacts, disruption and unsettling points before, during and after transformation that would need to be thoroughly investigated, understood and addressed, to successfully transform the editorial phase. The research contributes to both theory and practice. It also proposed a conceptual model to understand the transformation particularly in a public sector; it developed a guideline for effective transformation and developed a workflow for the editorial phase.
Acknowledgement

So many have crossed my path here, too many to name but I will try to include everyone who has contributed worldly to see me through the PhD.

I have been very ambitious since I was small. My late father wanted me to become a Doctor and since I could speak, I will tell everybody that I want to become a doctor when I grow up. Grew up I did, but I am neither rich nor brainy to pursue such big ambition. I am not even born to be patient, what’s more to undertake such huge task that requires that, day in, day out for 4 long years. Moreover, I was just an ordinary officer in a government agency, always branded slow and complacent by the privates. But there it nurtures healthy living environment and a passion in the work. Alhamdulillah, luck was on my side. In 2001, for months my home were the hospitals, and I was travelling 150 miles to and fro to Teluk Intan from Kuala Lumpur, where my comatose father was hospitalised and at the same time living with manuscripts and dictionaries next to my husband’s hospital bed in Kuala Lumpur. 2 months after my father passed away, in those dreaded days, I was given the chance in a million, while taking care of my ill husband in the hospital. It brought a new comfort and light into our lives.

When I first set foot in the UK, my 4 children were still small, my eldest was 7, the girls each 6 and 4 and my youngest son only 4 months old. Through thick and thin, we slogged through, no bed of roses, no silver lining, only hardship and living poor. Nonetheless, amidst all these, we created our very own happiness and contentment of being together and of enjoying what the Lord has bestowed upon us.

To my husband, Ismail Mohamed Ibrahim, who sacrificed his whole life for this quest, no words in this world could pen what I feel. His love, devotion, dedication, support and much more is incomparable to anyone and anything on the earth through my eyes. My children, Ariff, Aniss, Arissa and Amierullah, their sacrifices...what can you say, except, forgive me for not being there most of the time, and thank you for being there all the time.
To my mother, Maliyah Moh Yossoff, my mother in law, Ramelah Muit, my dear uncle Daud Mattan and aunt, Fatimah Moh Yossoff, my brothers and sisters, my in-laws, cousins, nephews, nieces, and all my family back home, thank you so much for being there for me through these difficult times. To my families here in the UK, the Malaysians, the Changs, thank you for everything you have given to our lives, they are all very much appreciated.

I am very much indebted to my sponsor, Dewan Bahasa dan Pustaka Malaysia, who has given me this chance, who believed in me and who was always eager to have me back. I am proud to be one of them and I am proud to serve back. Special thanks to Mdm. Rohani Rustam who has given great encouragement. Thank you to my bosses, colleagues and friends there, for those who helped me through, special thanks to my dearest friends, who have only words of comfort and encouragement, Mdm. Sa’odah Abdulllah, Faikha A Kadir, Rafeedah Rahim, Noorlinah and Salwa and all my brilliant interviewees.

To my supervisor, Prof. Peter J. Sackett, thank you very much for all the constructive comments, the counsels, the push, the drag, the arguments, the laughs, the tears, the support and the friendship. Without all these, I will never be who I am today.

To my friends in Enterprise Integration, in SAS and in Cranfield, thank you for being there in those good and difficult moments. Many thanks too to the two pretty girls, Marini and Btissame for adding colour, comfort and strength to this life.

And, to my Dad, Daut Mohmud Sulaiman Lubis, I dedicate this thesis to you with all my love written on every character. Time passed quickly, it has been 6 years since the day you left us on 29 February 2001, the day I watched the last of your breath on that hospital bed. You will always be there Dad, and I will always be your girl and your Doctor.

Dahlina Daut Mohmud Lubis
The Author

Dahlina Daut Mohmud started her early years by joining a local village school, where her mother taught the Islamic religion. In 1971, she joined the all girls Convent Primary School of Teluk Intan, proceeded to the Convent Secondary School and later joined the Sekolah Menengah Tuanku Syed Putra, Perlis, a science boarding school. After completing the Malaysian Certificate of Education, she joined the National University of Malaysia and graduated in 1989 with a BSc. (Hons.) in Microbiology. By 1990, she became an editor at The Institute of Language and Literary Planning, Malaysia, overseeing the publication of translated medical and science books for higher learning. In 1991, she received The Diploma in Translation and awarded the best student. She was Head of Translation Services with The Malaysian Translators’ Association for 5 years until 2001. Since then, she has been an editor in the Translation Division, Social Sciences and Textbooks Division. She was seconded to the Multimedia Unit to help set up the first online publishing and in 2001 was awarded a scholarship to do her Masters Degree in Multimedia Computing at the University of Central Lancashire, UK, prior to the PhD programme at Cranfield University.

Nonetheless, her proudest and most enjoyable moments were in the outdoor. She was a 100 and 400 meter sprinter in her school days, a centre forward for the girls’ hockey team and the midfielder in the softball (equivalent to baseball) team. She was an Outdoor Recreation Coach under the Ministry of Youth and Sports, specialising in abseiling, mountain climbing and jungle trekking and has conquered several of the highest peaks in Peninsular Malaysia. In 1991, she also became one of the first women to canoe around Singapore.
Preface

This research should serve as a foundation of respect towards editors and all human beings. It was intended to capture the hearts of editors, read their mind and share their grief and annoyance as well as their passion, thus construed as a platform for better professional deliverance in the social and business encounters. Incidental thereto, it did capture the unlikeliness of passionate editors, hence manifesting the darker side of the editorial phase shrouded in government and political turmoil. Subsequently, it conceals the best intentions of human being, where it did not intend to infiltrate in the first place. Set forth against this backdrop, it is hope that this research should not be taken as an act of subversive retaliation, but an early warning and a signal of internal conflicts that should be rectify without prejudice for a better future. This research is an honest account to unveil the mysteries of the editorial phase. It has been conducted based on information and in any way possible depart from being bias.

2.5 Summary  79

Chapter 3 Methodology  82
3.1 Introduction  82
3.2 Research Philosophy  82
  3.2.1 Positivism versus Phenomenological  83
    3.2.1.1 Positivism  83
    3.2.1.2 Phenomenological  83
3.3 Research Purpose  84
3.4 Research Strategy  85
  3.4.1 Case Study  85
  3.4.2 Units of Analysis  87
  3.4.3 Case Study Design  87
  3.4.4 Selection of Case  88
  3.4.5 Research Strategy Selection  89
3.5 Data Collection Methods  90
4.6.1 The Main Issues in the Transformation are Human Factors, Lack of Confidence in the System and Management, Distrustful of the Management Intentions, No Expertise in Certain Areas of Transformation, Insufficient Information Regarding the Transformation and the System and the Most Problematic Area is the Textbook Production

4.6.1.1 Human factors

4.6.1.2 Lack of confidence in the system and the management; distrustful of the management intentions, no expertise in certain areas of transformation, insufficient information regarding the transformation and the system

4.6.1.3 Transformation of the Textbook Division

4.6.2 The Implications on Knowledge Intensive Products are Reflected on the Standard and Quality of the Product

4.6.3 The Implications on the Editorial Processes are Reflected by the Work Procedure, Work Schedule and Communication in the Flow

4.6.4 Editors have Bad Experience and Dissatisfied with the Implementation of SPMP; Editors were Dissatisfied by the Way the Company Addresses the Issues on SPMP and Contracts Signed; the Implication on Editors are Reflected in their Responsibilities, Workload, Commitment and Training

4.6.5 The Future Systems Should Take into Consideration Aspects of Transparency, Human Factors, Contractors, Workload and Authority

4.7 Developing the Conceptual Model

4.8 Conclusion on Focus Study Propositions

Chapter 5 Research Findings: Focus Study Evidence

5.1 Findings from Preliminary Study

5.1.1 Revisiting the High Level Understanding of E-Transformation

5.2 Focus Study Research Propositions

5.3 Focus Group Interview
5.3.1 Interviewees

5.3.2 Methods of Analysis

5.3.3 Analysis of the Flow of Data

5.4 Addressing the Propositions

5.4.1 Proposition 1: To Further Explore and Understand the HITEC Issues (Human Factors, Information, Trust, Expertise and Diffidence) In E-Transformation and What Transpired it and How These Issues Affect the Transformation of the Editorial Phase

5.4.1.1 Automation related issues
   i. Negative perception and scepticism

5.4.1.2 The issues on management
   i. Issues on management
   ii. Issues on authority
   iii. Issues on government

5.4.1.3 Issues related to human factors
   i. Human factors
   ii. Diffidence
   iii. Distrustfulness
   iv. Indifference

5.4.1.4 System development issues
   i. System development issues
   ii. Computing Division
   iii. Contracts
   iv. Contractors

5.4.2 Proposition 2: To Explore and Understand the Implications of E-Transformation on the Product (Standard, Quality), Process (Work Procedure, Work Schedule,) and the Editors (Responsibilities, Workload, Commitment, Training and Communication) in the Editorial Phase

5.4.2.1 Understanding issues in quality
   i. Issues in quality
   ii. Issues in standard
5.4.2.2 Understanding the work issues

i. Issues in work culture

ii. Issues in work procedure: The manual on work procedure

iii. Issues in work schedule

The Organisations’ Scenario – Administrative

iv. Issues in workload

5.4.2.3 Understanding the issues on editors

i. Issues on creative work

ii. Issues on editing

iii. Issues on e-publishing

5.4.3 Proposition 3: To Explore and Understand System Implementation Issues (Editor's Experience with SPMP, Management) and Future System (Transparency, Human Factors, Contractors, Workload, Authority)

5.4.3.1 The SPMP issues

i. The SPMP- overview

ii. SPMP system guidelines

iii. Using the manual

iv. System organisation and function

v. The SPMP issues

5.3.3.2 Experience issues

i. Dissatisfaction

ii. Frustration

iii. Incompetence

iv. Unreliable

5.3.3.3 Future systems

i. Awareness

ii. Commitment

iii. Communication

iv. Expertise
v. Security 168
vi. Technology 169
vii. Training 170

5.4 Conclusion 170

Chapter 6 Data Analysis 172

6.1 Revisiting the Conceptual Model 172
   6.1.1 Operationalising the Business Model 175
6.2 Association of Variables 177
6.3 Past Experiences with SPMP and its’ Effect on Transformation 181
   6.3.1 Performance of DBP after SPMP 185
6.4 Addressing Research Objective 1; Research Question 1 185
   What are the issues in e-transformation in the editorial phase?
   6.4.1 Management Issues 188
      6.4.1.1 Ministry effect – top level 190
      6.4.1.2 Department effect – (from the Head of Divisions)- lower level 191
6.4.2 Human Factors 192
6.4.3 Perceptions Issues 193
6.4.4 System Development Issues 194
   6.4.4.1 Contract and contractors 195
   6.4.4.2 Computer Division 195
   6.4.4.3 Changes in role 196
   6.4.4.4 Technology transfer 196
6.4.5 Conclusion 197
6.5 Addressing Research Objective 1; Research Question 2

What are the changes in e-transformation of the knowledge intensive phase?

6.5.1 Changes in Architectures

6.5.1.1 Changes in management structure

6.5.1.2 Changes in process structure

6.5.1.3 Changes in system structure

6.5.2 Changes in Industry Standards

6.5.3 Integration and Disintegration of Elements

6.5.4 Linkages between Various Elements Across Super System

6.5.5 Substitutions within the Subsystem

6.5.6 Disruption of Workforce

6.5.7 Conclusion

6.6 Addressing Research Objective 1; Research Question 3

What are the implications on the quality and standard in knowledge intensive products?

6.6.1 Effects of Transformation on Quality and Standard

6.6.2 Relationship between System Development and Standard and Quality

6.6.3 Conclusion

6.7 Addressing Research Objective 1; Research Question 4

Will e-transformation change the work-related aspects of editors?

6.7.1 Effects of Transformation on Work Related Issues

6.7.2 Relationship between Human Factors and Work Related Issues

6.7.2.1 Relationship between diffidence, distrustful and indifferent and work culture
6.7.2.2 Relationship between diffidence and work procedure

6.7.3 Relationship between Human Factors and Workload

6.7.3.1 Relationship between diffidence and workload

6.7.4 Relationship between Management and Work Related

6.7.4.1 Relationship between management and work culture, work procedure and workload

6.7.5 Relationship between System Development and Work Related

6.7.5.1 Relationship between contract and work culture and work procedure

6.7.5.2 Relationship between contractors and work culture, work procedure and workload

6.7.5.3 Relationship between perceptions and work related issues

6.7.5.4 Relationship between negative perceptions and work culture and work procedure

6.7.5.5 Relationship between sceptical and work culture and work procedure

6.7.5.6 Relationship between sceptical and workload

6.7.6 Relationship between Standard and Quality and Work Related Issues

6.7.6.1 Relationship between quality and work procedure

6.7.7 Conclusion

6.8 Addressing Research Objective 1; Research Question 5

What are the issues and implications surrounding reengineering of the editorial processes?

6.8.1 Editing

6.8.1.1 Relationship among variables
6.8.1.2 Exploring differences between groups

i. Group 1: T1C1 and T1E1

ii. Group 2: T2C2 and T2E2

iii. Group 3: T1CT1 and T1ET1

iv. Group 4: T2CT2 and T2ET2

6.8.2 Creative Disruption

6.8.2.1 Mann-Whitney Test 1

6.8.2.2 Mann-Whitney Test 2

6.8.2.3 Mann-Whitney Test 3

6.8.2.4 Mann-Whitney Test 4

6.8.2.5 Mann-Whitney Test 5

6.8.3 Correlation of Statistical Data onto Model

6.8.4 Conclusion

6.9 Issues and Implications on the Editors

6.9.1 Relationship between Human Factors and Editors

6.9.1.1 Relationship between diffidence and editors

6.9.1.2 Relationship between distrustful and editors

6.9.1.3 Relationship between indifference and editors

6.9.2 Relationship between Management and Editors

6.9.2.1 Relationship between management and editors
6.9.2.2 Relationship between authority and editors 238
6.9.2.3 Relationship between government and editors 238
6.9.3 Relationship between System Development and Editors
   6.9.3.1 Relationship between Computer Division and editors 239
   6.9.3.2 Relationship between contractors and editors 239
6.10 Addressing Research Objective 2; Research Question 6
   How Should Future Systems Works?
   6.10.1 Relationship between Future System and Work Related 241
   6.10.2 Relationship between Future System and Standard and Quality 244
   6.10.3 Relationship between Future System and Editors 245
   6.10.4 Conclusion 246
6.11 Overall Conclusions 247

Chapter 7 Discussions and Conclusions 248
7.1 Research Objective 1 248
   7.1.1 Addressing Research Question 1
      What are the Issues in E-Transformation in the Editorial Phase
      7.1.1.1 Management issues 252
      7.1.1.2 Human factors 253
      7.1.1.3 Perceptions on automation 253
      7.1.1.4 System development issues 254
   7.1.2 Addressing Research Question 2
      What are the Changes and Impacts of E-Transformation on Knowledge Intensive Phase?
7.1.3 Addressing Research Question 3
What are the Implications on the Quality and Standard in Knowledge Intensive Products?

7.1.4 Addressing Research Question 4
Will E-Transformation Change the Work Related Aspects of Editors?

7.1.5 Addressing Research Question 5
What are the Issues and Implications Surrounding Reengineering of the Editorial Processes?

7.1.5.1 Disruption

7.1.6 Addressing Research Question 6
What are the Needs of Future Systems in Relation to the Phase?

7.2 Adoption of Framework into Global Industry

7.3 Applicability of Research Model

7.4 Guidelines for Business Transformation

7.4.1 Aligning Industry Strategy with the Governments’ IS Strategy

7.4.1.1 Selection of software in compliance with Government’s OSS

7.4.1.2 Understanding of technical specifications and standards for OSS

7.4.1.3 Implementation issues and guidelines

7.4.1.4 Revise the manual on work procedure

7.4.1.5 Revise the Company’s house styles

7.4.2 Adherence to Other Standards and Methods

7.4.3 Refer to Company’s Requirements

7.5 Editorial Workflow

7.6 Contributions of this Research
7.6.1 Contribution to Evolution in Scholarship Literature 265
7.6.2 Contribution to Editorial Phase Literature 265
7.6.3 Contribution to BPR in the Public Sector Literature 266
7.6.4 Contribution to Malaysian Transformation Literature 266
7.6.5 Contribution to Practice 267
7.7 Limitation of Study 268
7.8 Recommendation for Future Research 269
7.9 Chapter Conclusion 270
8.0 References 271
9.0 Appendices 289

Appendix 1: Interview Questionnaires - Focus Study Interview Questionnaires 289
Appendix 2: Excerpt from the Preliminary Focus Group Interview 290
Appendix 3: Samples of Focus Group Interview 298
Appendix 4: Sample of Text 1 - On Screen Editing 308
Appendix 5: Sample of Text 2 - On Screen Editing 310
Appendix 6: Sample of Text 1 – Conventional Editing 311
