Progress with the LandIS Support Contract

Reporting Period: 1 October, 2009 – 31 December, 2009

Database Maintenance

No specific maintenance issues are reported in this period. The LandIS ‘Virtual Server’ continues to provide good service to the project. The service team in the Cranfield University IT computing group provides a high standard of maintenance care and support.

Usage

The Soil Site Reporter (<http://www.landis.org.uk/reports/>) continues to be used extensively with numbers steadily increasing. In the current period there have been 32 new companies and 454 new users registered. Importantly, and following a recent promotional campaign, this now includes 20 new Universities who have registered to take advantage of our initiative to provide free soil site reports made available as a general educational resource to all UK University Undergraduate students. This has included 300 new student registries. The Soilscales viewer has received around 3,000 map requests per week over the last 3 months with a peak weekly request figure of 5,000.

The following figures illustrate the level of response and use of the reporter to-date (figures 1-2):

Total companies: 312

Total users: 1523

Company/user Totals

Total universities (excl. Cranfield): 128

Total students: 820

University/student Totals

Figure 1. Summary of Soil Site Reporter uptake by user group

Report purchases by purchase type

■ Free (£59,836.00) ■ Full payment (£35,931.21)
■ Free voucher (£8,514.00) ■ Discounted voucher (£15.28)

Figure 2. Summary of report types served by Soil Site Reporter

Metadata

The entries for the LandIS datasets presented via the ‘GIGateway’ metadata portal (www.gigateway.org.uk) were reviewed for consistency.

The open-source software tool ‘GeoNetwork’ (<http://geonetwork-opensource.org/>) has been further investigated to serve as a metadata server for the LandIS soils data holdings. Figure 3 shows a prototype installation of this software with sample LandIS metadata displayed.

Figure 3. Prototype GeoNetwork installation showing LandIS metadata

Further correspondence was held with staff from “Action 11601 - Community Spatial Information Network (COSIN)” and “Action 22004 – Soil” in the “European Commission - Joint Research Centre” to seek a conformity with emergent EU metadata practices.

Work In Progress

There are three more quarters to go before the end of the current LandIS Reference Site support contract. Over this period the LandIS team will be focusing on three areas:

Completion of improved data product documentation

The set of soil data product descriptive pages completed to date has been collated together and passed for critical reading to senior NSRI staff.

Full metadata for LandIS products to be compiled into the GeoNetwork software tool

Work will continue to transcribe the metadata entries for the LandIS soils datasets into the GeoNetwork format for loading to the prototype GeoNetwork server. It is anticipated that this server will ultimately be placed on a public-facing computer server.

Soil Site Reporter version 2 to be completed and launched

The new prototype Soil Site Reporter software, v2, is now fully developed and functional and has progressed to the testing phase. It is anticipated this will be launched in Spring 2010.

LandIS PERSONNEL/TIME

Time put down to the LandIS project for the period Apr 09 to Dec 09 with budgeted days for Year 3 (Apr 09 to Mar 10) in brackets:

Caroline Key	41	(58) days
Timothy Farewell	37	(50) days
Stephen Hallett	18	(28) days
Andrew Rayner	48	(50) days
Michelle Clarke *	6	(0) days
Mark Kibblewhite **	0	(2) days

* Michelle Clarke's assisted in the development of the new soil product descriptions. Her time will be taken from Stephen Hallett's allocation.

** Mark Kibblewhite is standing in for Dick Thompson's original role in the project and prior to recruitment of a succeeding NSRI Director.

Defra budget used between 1st April 2009 and 31st December 2009

£4,725 was spent from a budget of £5,800 for 12 Defra projects. This means there is still £1,075 remaining in the budget to cover Defra data leases up to the end of March. New data leases this quarter have been highlighted ***NEW***.

The 6 data leases marked with a * were deferred from last years budget until the beginning of April, 2009.

NEW DATA LEASES FOR THE YEAR TO DATE

Organisation	Abstract	Purpose of Use	Start Date	End Date	P&A	Uncharged Royalty
Data Lease funded by DEFRA via the LandIS fund						
NERC / CEH*	1km resolution soil carbon database for England and Wales, giving the soil series in each 1km square together with particle size, bulk density and carbon content for layers 0-30cm and 30-100cm	To be used by CEH (Edinburgh) for DEFRA Project on Preparation of Annual Greenhouse Gas Inventory for LUCF in the UK	01/06/2008	31/07/2010	£200	£50,000
Forestry Commission*	NSI data points - DEFRA contract SP0521.	Forestry Commission research project EH66600E 'Carbon dynamics in forests'.	11/10/2008	10/10/2009	£200	£97,000
University of Stirling*	NATMAP vector, NSI topsoil, SOILSERIES hydrology, SOILSERIES pesticides.	Defra project: FC1177 "Development of a risk evaluation system for the establishment of Gyrodactylus salaris in English and Welsh river systems." Data to be used by David Morris.	23/02/2009	22/02/2010	£375	£112,000
Forestry Commission*	NATMAP vector - Breckland Forest area	Data to identify heathland areas and for use in forestry planning	25/02/2009	21/02/2014	£375	£3,000
Maslen Environmental*	Soilscapes for England and Wales.	Defra R&D project SP0573: Basis of the UK BAP target for the reduction in use of peat in horticulture Development of a map showing lowland raised peat bogs where the peat deposits have historically or are currently being extracted.	02/02/2009	01/02/2010	£375	£38,525
Environment Agency*	NSI Carbon/texture data Soil C (%)	DEFRA project SP0562 - 'Co-ordinate an expert group to assemble UK-wide data on soil carbon (and greenhouse gas fluxes) in the context of land management).	19/01/2008	18/01/2010	£375	£2,400

Organisation	Abstract	Purpose of Use	Start Date	End Date	P&A	Uncharged Royalty
BBSRC	County-level soil property data defining, for the 3 most common soil types present: maximum organic carbon content(%); minimum soil organic carbon content (%); clay content (%); pH; bulk density (g/cm ³); total soil porosity (% volume); water content at field capacity (1/3 bar tension) as a % of total water content at wilting point (15 bar tension) as a % of total porosity, of the topsoil layer; together with soil texture class and Hydrology Of Soil Types (HOST) grouping.	For use solely as input data to any version of the UK-DNDC model for the purpose of deriving emission factors for the UK N20 inventory as required by the Department of the Environment, Food and Rural Affairs (Defra). Ref: DEFRA project code: CC0266. 2008 - same project but code changed to AC0101. 2009 - DEFRA AC0112: Inventories of ammonia and greenhouse gases from UK agriculture	01/04/2009	31/03/2010	£200	£66,029
DEFRA	Soilscapes data.	DEFRA project ref: IF0128. The potential impact of Climate change on diseases influencing the UK strawberry industry.	19/05/2009	30/04/2011	£375	£24,078
DEFRA	NATMAP 1km, with Attributes and HOST.	Extending the evidence base on the ecological impact of fine sediment and developing a framework for targeting mitigation of agricultural sediment loss. DEFRA project code: WQ0128	01/07/2009	31/03/2012	£375	£28,000
DEFRA	1km NATMAP with Attributes.	Characterisation of soil structural degradation under grassland and development of measures to ameliorate its impact on biodiversity and other soil functions. DEFRA project code: BD5001.	01/07/2009	31/12/2013	£375	£23,000
Royal Veterinary College *NEW*	Soilscapes- Wales Yr 2 & Yr 3 - Soilscapes England	To be used in a study of risk factors of disease introduction in a population of cattle herds and sheep flocks in Wales. DEFRA code: SE4002/CTA0301. (Single User licence)	01/05/2009	30/04/2010	£375	£19,263
BGS *NEW*	NATMAP vector, HORIZON fundamentals - texture & carbon for topsoils for England and Wales.	DEFRA project SP0571 'UKCIP08 Scenarios & climate change pressures/threats to soils in England and Wales.	13/07/2009	12/07/2010	£375	£52835
DEFRA *NEW*	NATMAP vector, soilscapes, legend, associations. SOILSERIES info, hydrology, pesticides, agronomy.	DEFRA project: IF0143 Modelling the spatial and temporal management of land-use to optimise biodiversity.	01/12/2008	30/11/2011	£375	£81,278

DEFRA *NEW*	NATMAP vector and Soilscales data	Defra and the Environment Agency - National ecosystem assessment project.	09/03/2009	28/02/2011	£375	£56938
--------------------	-----------------------------------	---	------------	------------	------	--------
